Waterfall spouts

Stage 1. Unscrew old spout

TIP: If the spout is stiff to twist and hard to remove a rubber strap wrench is ideal for undoing them as shown here: Another way is to insert a screw driver into the outlet and use it as leverage to undo it.

Stage 2. Prepare your new spout

1. Apply thread seal tape to the thread sticking out of your wall.
2. Screw outlet on to the end then loosen grub screw beneath.
3. You can now pull the spout off and wind the adaptor on as close as possible. A large Allen key can be used to wind on the adaptor. This process avoids your tiles being scratched by the spout if the plumbing is not square.

Stage 3. Fix on your new spout

1.

1. Once the adaptor is as close to the wall as possible, push the spout back on.
2. Once level re-tighten the grub screw to hold the spout in place.

2.

Enjoy your new waterfall spout!

TIP: These instructions show the Carribean spout however the process is the same for all waterfall spouts in the ezyfix range.
