

INSTALL GUIDE

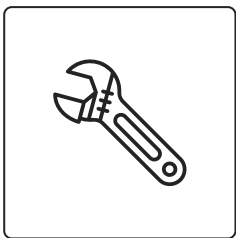

LEVER MULTIFIT BASIN TAPS

TOOLS & PARTS FOR INSTALLATION

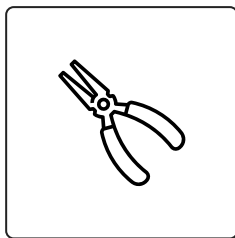

For installation, you'll need an adjustable spanner and pliers to help secure and tighten your EZYFIX tapware.

Inside the box you'll find the Modern Lever Taps, cartridge assemblies, spindle extenders, anti-vandal spanner, and locking nuts.

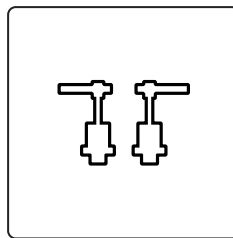

To remove your old tapware, you may also need a pointed nose pliers, rubber strap wrench, and a basin wrench to help loosen and access tightly fitted or hard-to-reach components.

ADDITIONAL ASSISTANCE

Need a hand with installation? Call our DIY helpline on [1300 399 349](tel:1300399349), available 7 days a week, 7:30am – 7:30pm AWST (excluding WA public holidays). Or scan the QR code to watch our step-by-step video.

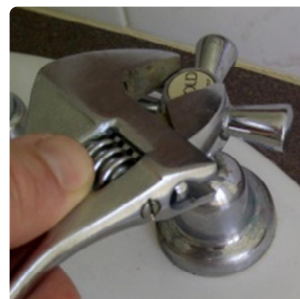

STEP-BY-STEP INSTALLATION

1

Remove old taps

1. Turn off the water at your meter and drain the system by opening the lowest hot and cold outlets in your home (usually the bath taps).
2. Undo the old buttons, handles, flanges, spindles and jumper valves. The rubber strap wrench is ideal for undoing tight dress flanges.

EZYtip: The empty EZYFIX packaging is a great way to handle the old fittings as you remove them so as to avoid damage to your bath or your bathroom surface.

2

Prepare your new EZYFIX taps

1. Disassemble your new Modern Lever taps with the anti-vandal spanner provided in the pack. It is **CRUCIAL** that you separate the Locking Nut from the Ceramic Cartridge.

EZYtip: Place the components down in order of removal to make reassembly simple.

2. Check to see the depth of your existing tap seat. Measure the old spindle against the new spindle provided and identify whether you need to install a spindle extension.

Note: If there is enough height adjustment on the ceramic cartridge, then it's not required.

STEP-BY-STEP INSTALLATION

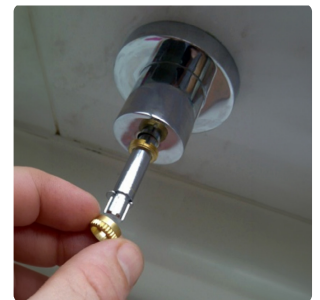

3

Install your new EZYFIX taps

1. Screw in the ceramic cartridge by hand until it reaches the tap seat. Then gently tighten with a spanner at about the same strength you would use to turn off a tap. Place the fibre washer over and then tighten on the lock nut firmly with a spanner.

2. Screw on the tap flange and re-install the discreet locking nut, circlip, handle adaptor and then handle.

EZYtip: Don't tighten up the handle yet. Wait until you turn on the mains water to set the lever at the angle you want it to be when the taps are off.

**4**

Job done!

Turn on your water supply at the mains then run back inside to turn off your running tap. You can now select what angle you want your levers installed at, and then secure them with the anti-vandal spanner.

NO EXCUSES – 5 YEAR WARRANTY

It means you can install EZYFIX tapware yourself, following our instructions, and still be fully covered by our 5 year warranty. Unlike many other manufacturers, we do not void your warranty simply because the product was not installed by a licensed plumber.

Important note: Please check your relevant state or territory regulations before carrying out any DIY plumbing work.

Any warranty claim must be made within 5 years of the date of purchase. To make a claim, please contact EZYFIX Tapware directly.

Where a valid warranty claim is approved, EZYFIX Tapware will cover reasonable, direct costs associated with making the claim. Supporting documentation may be required.

This warranty is provided by EZYFIX Tapware ABN 43 009 208 459, 138 Hasler Road, Osborne Park WA 6017, (08) 9272 6511, sales@prideindustries.com.au.

This warranty is provided in addition to your rights under the Australian Consumer Law. Our goods come with guarantees that cannot be excluded. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have goods repaired or replaced if they fail to be of acceptable quality and the issue does not amount to a major failure.
